Bautista D'Alessandro

Java Full Stack Developer · Spring Boot · React · TypeScript

PROFILE

Java Full Stack Developer with 4+ years of experience building, maintaining and modernizing critical nationwide enterprise applications for agri-food control, inspection and traceability. I work with Java 11/17, Spring Boot, Hibernate/JPA, Oracle, React and TypeScript across the full development lifecycle: analysis and design, code review, testing, deployment and post-release support. Outside work, I design, build and run my own web products in production (see portfolio).

EXPERIENCE

Semi-Senior Java Full Stack Developer

Dec 2021 – Present

SENASA · National Agri-Food Health and Quality Service (Argentina) · Buenos Aires (hybrid)

- Build features and evolve nationwide applications using Java 11/17, Spring Boot, Oracle SQL, React and TypeScript.
- Implement critical business rules for agri-food control, inspection, certification and traceability processes.
- Develop and maintain REST APIs and system integrations, including legacy REST and SOAP services.
- Containerized applications with Docker and implemented centralized authentication and authorization with Keycloak.
- Modernize legacy Java applications: upgrading dependencies, frameworks and JBoss/WildFly application servers.
- Migrated repositories from SVN to Git/GitLab, preserving history, versioning strategy and development branches.
- JasperReports reporting; analysis, design, code review, testing, deployments and post-release support with technical and business teams (Scrum, Jira).
